

POWER BI QUIZ

Screenshot of a web-based quiz interface showing two questions.

Question 2
1/1 point (ungraded)

What application will you use to access data sources and build your data models?

Power Query
 Power BI Desktop
 Tableau
 Power BI Report Server

✓
Submit Show Answer

Question 3
1/1 point (ungraded)
[Keyboard Help](#)

Match the definitions to their appropriate term.

An on-premises hosting platform instead of in the cloud	A free Power BI Windows desktop application from Microsoft to create data models and reports	Where you access reports from the Service or report server on your phone	A platform accessible through PowerBI.com that uses Microsoft's infrastructure to store and run reports	Where we connect to data sources and construct a data model
---	--	--	---	---

ANSWER

Question 2

1/1 point (ungraded)

To create a new visualization, we must click out of an already selected chart before selecting a new chart.

True

False

✓

Answer

Correct:

If we keep a chart selected and attempt to add a new chart, it will change the selected chart into the new chart we have clicked. To avoid this, it is very important to learn to first UN-SELECT the chart we are working in before adding a new chart to the report canvas.

Submit Show Answer

Question 3

1/1 point (ungraded)

Which of the following is not a correct way to add a field to a visualization?

Drag and drop from fields pane onto the visualizations pane

Click the field's checkbox in the fields pane

Double-click the field in the fields pane

Drag and drop from fields pane onto the visualization in the report body

Question 3

3.0/3.0 points (ungraded)

Check all of the scenarios for which we would use the conditional formatting visualization in Power BI.

Changing the font color/background color of the cell depending on which numbers in the column are highest or lowest

Grouping cells together based on whether their values are within a certain range

Using data bars to show a small graphical representation behind our numbers

Using the icons as a kind of warning indicator, and set up rules that say "when a cell goes below this value, display a big red X symbol"

Creating a visual that pulls different values from our data model and color codes them

✓

The screenshot shows a Microsoft Edge browser window with several tabs open. The active tab displays a Power BI quiz question about navigating hierarchies in a matrix. The browser's address bar shows the URL: <https://courses.edx.org/courses/course-v1:DavidsonX+DavidsonX.D005+1T2020/courseware/e877fac0493c44ffba89708f24903230/539571f001424...>. The taskbar at the bottom shows various pinned icons.

Please complete the comprehension quiz below to go on to the next section.

Question 1

1 point possible (ungraded)

When navigating through a hierarchy in a Power BI matrix, how can we return to the top level of the hierarchy?

- Drill down
- Show next level
- Drill up
- Expand current selection

Submit

The screenshot shows a Microsoft Edge browser window with several tabs open, similar to the first one. The active tab displays a second Power BI quiz question about creating hierarchies. The browser's address bar shows the same URL as the first screenshot. The taskbar at the bottom shows various pinned icons.

Question 2

1 point possible (ungraded)

To create a hierarchy in Power BI requires a minimum of how many columns?

- Two
- Three
- Four
- Ten

Submit

The screenshot shows a Microsoft Edge browser window with several tabs open, similar to the previous ones. The active tab displays a third Power BI quiz question. The browser's address bar shows the same URL. The taskbar at the bottom shows various pinned icons.

Please complete the comprehension quiz below to go on to the next section.

Question 1

1/1 point (ungraded)

True or False: Layering measures within other measures makes it more difficult to troubleshoot errors in our DAX calculations.

True

False

✓

Answer
Correct:
Structuring measures in a layered way makes it much easier to go back, troubleshoot, and fix when errors occur, especially across multiple measures.

Submit

Show Answer

Question 2

1/1 point (ungraded)

When Power BI gives us a warning about the many-to-many relationship, we click "OK" only when we understand what we're doing. Why?

They are the rarest and most complex type of relationships

They can introduce ambiguity into the data model

Such relationships can lead to incorrect calculation results

None of these

All of these
